➔ DATASHEET: **EveryonePrint Hybrid Cloud Platform**

➔ EveryonePrint Hybrid Cloud Platform

EveryonePrint Hybrid Cloud Platform (HCP) is an all-in-one print management solution that eliminates the need for complex, on-premise print management. HCP provides organisations with all the features and benefits of a software as a service solution (SaaS), in the cloud.

Cost Reduction

Organisations can unburden themselves from running and maintaining on-premise print management and the costs associated. No software, maintenance, server or update costs.

Centralised Management

Leverage the ease of having one print driver for all printers, improving the user experience and reducing IT maintenance and support.

HCP deploys through a single web-based interface, giving businesses complete control of their printing.

Increased Security

Hybrid Cloud Platform helps customers proactively protect their data whilst working towards compliance.

- Full data encryption
- Auditing functionality
- Managed Risk

Versatile

This solution supports most MFP manufactures and can be utilized in a mixed fleet environment.

Scalability

The solution is fully scalable to meet business and cost requirements - from small businesses to global enterprise organisations.

ROI

HCP offers significant savings, customers typically see return on investment between 6-12 months after implementation.
