ProcessFlows' Dashboard Solution for Places for People Reaches Final in European IT Awards

WINCHESTER, HAMPSHIRE, UK – 17th March 2017 – [ProcessFlows](#) has reached the final in *the Big Data, IoT or Analytics Solution of the Year (Solution Provider) category* of the 2017 European IT & Software Excellence (ITE) Awards with Places for Peoples' dashboard project. Places for People, one of the largest property and leisure management, development and regeneration companies in the UK, implemented data visualisation solution, [Intuitive Dashboards](#), to better understand and act upon its key performance data.

The ITE Awards are the leading pan-European awards for independent software vendors (ISVs), solution providers and systems integrators and their vendor and distributor partners. They reward those providers that get to the heart of customer issues, delivering better business, a clearer understanding of data and more efficient and profitable outcomes.

The key measures for success of the project were to provide Places for People with an architecturally flexible, user-friendly, quick-to-deploy and cost-effective dashboard solution. Intuitive Dashboards from Intuitive Business Intelligence fitted the brief in every way.

Cameron Smith, Director of Direct Business from ProcessFlows says, *"Reaching the final of these sought-after awards is testament to Intuitive Dashboards' powerful functionality, ease-of-use and low cost of ownership as well as the hard work and tenacity of the Process Flows team."*

ProcessFlows worked in close partnership with Places for People to ensure the solution fulfilled all their needs, especially their requirement for self-sufficiency. Business-wide information is now instantly available and importantly, the company doesn't have to rely upon third parties to maintain the system, staff can now quickly and easily do it themselves.

Joanne Greenhalgh, Information Manager from Places for People comments, *"We have been amazed at how easy the solution has been to both implement and use. Staff were up-and-running very quickly and became proficient at using the solution within a matter of days, allowing us to create new dashboards, analyse data and run reports with incredible ease. We now have a solution at our disposal which ensures we provide first-class customer service whilst remaining a step ahead of our competition."*

Winners will be announced on Thursday, 30th March at the European IT & Software Excellence 2017 Awards Dinner at the Royal Garden Hotel, London.
